Part 1

What are possible ways an HTML document gets its style?

What is the use of @font-face rule?

I want to give background image to a h1 tag and the image of my choice has same height as the height of h1, but just few pixels in width. What should be my css so that I see that background image throughout the width of h1 tag.

What does following selectors select
a.nav li
b.nav >li
c.h1, h2, p
d..special, .flashy
e..special.flashy
f.#mission .highlight
g.p:nth-child(2)
h.p:nth-child(even)
